# About ASD

The Aerospace and Defense Industries Association of Europe (ASD), represents the Aeronautics, Space, Security and Defense industries in Europe. These industries, in turn, generate a turnover of approximately 171 billion Euros, employ some 730,000 people and encompass over 2,000 companies and 80,000 suppliers.

Thanks to their dynamism and innovative strength, our industries help Europe to achieve and maintain technological excellence

President and Chairman of the Council is Mr **Jean-Paul Herteman**, CEO of Safran,

# ASD's overall mission

Enhance the competitive development of the Aeronautics, Space, Defense and Security Industry in Europe in partnership with European Institutions and Member associations.

- Represent the European industry to promote its interests and to ensure high priority for this sector in European public policy.
- Offer a single point of contact between this industry sector and relevant stakeholders in the European institutions.
- Facilitate the development of SMEs and the Equipment sector within a competitive supply chain.
- Coordinate at the European level such services and activities as R&T, cooperative European initiatives, **standardization**, training/retraining, quality, airworthiness; assess human resource and skills ....
- Promote international cooperation, lead the dialogue with other International Associations and Organizations and represent the European Aerospace and Defense industry towards the industry of other countries/regions.

The predecessor of AECMA the "Association Internationale des Constructeurs de Matériel Aérospatial, AICMA" was founded in **1950**.

In **1973** the AICMA became AECMA (European Association of Aerospace Industries) in the context of growing European awareness and increased trans-national cooperation.

**2004** AECMA, EDIG and EUROSPACE merged to form Aerospace and Defense Industries Association of Europe, ASD.

# ILS Specifications

Under the umbrella of AECMA/ASD European Aerospace and Defense Industries, Organizations and Customers started to develop and maintain specifications to support the Integrated Logistic Support elements.

Since the millennium several MoU were signed between AIA and ATA for the further development of the S1000D.

In 2010 a MoU was signed with AIA in order to promote a common, interoperable, international suite of integrated logistics support specifications in the Aerospace and Defense Industries of Europe and the United States and to make optimal use of the resources available, ASD and AIA agreed to work in concert on the joint development of the S-Series ILS specifications.
