Member of a number of S1000D Working Groups and Task Teams

Been with S1000D development for some 20 years

Ex Director of Through Life Support with the MOD

Strategic Development Manager for Asset Management within LSC

# Agenda

Background

Organization

Council Direction

S1000D as part of ASD Standards

Lessons learnt

Resource

Way Forward

Summary

# History

1984 - AECMA countries and MoD customers started the development of an international Specification for Technical Publications

1989 - First release of S1000D

1998 - Start of formal USA involvement.

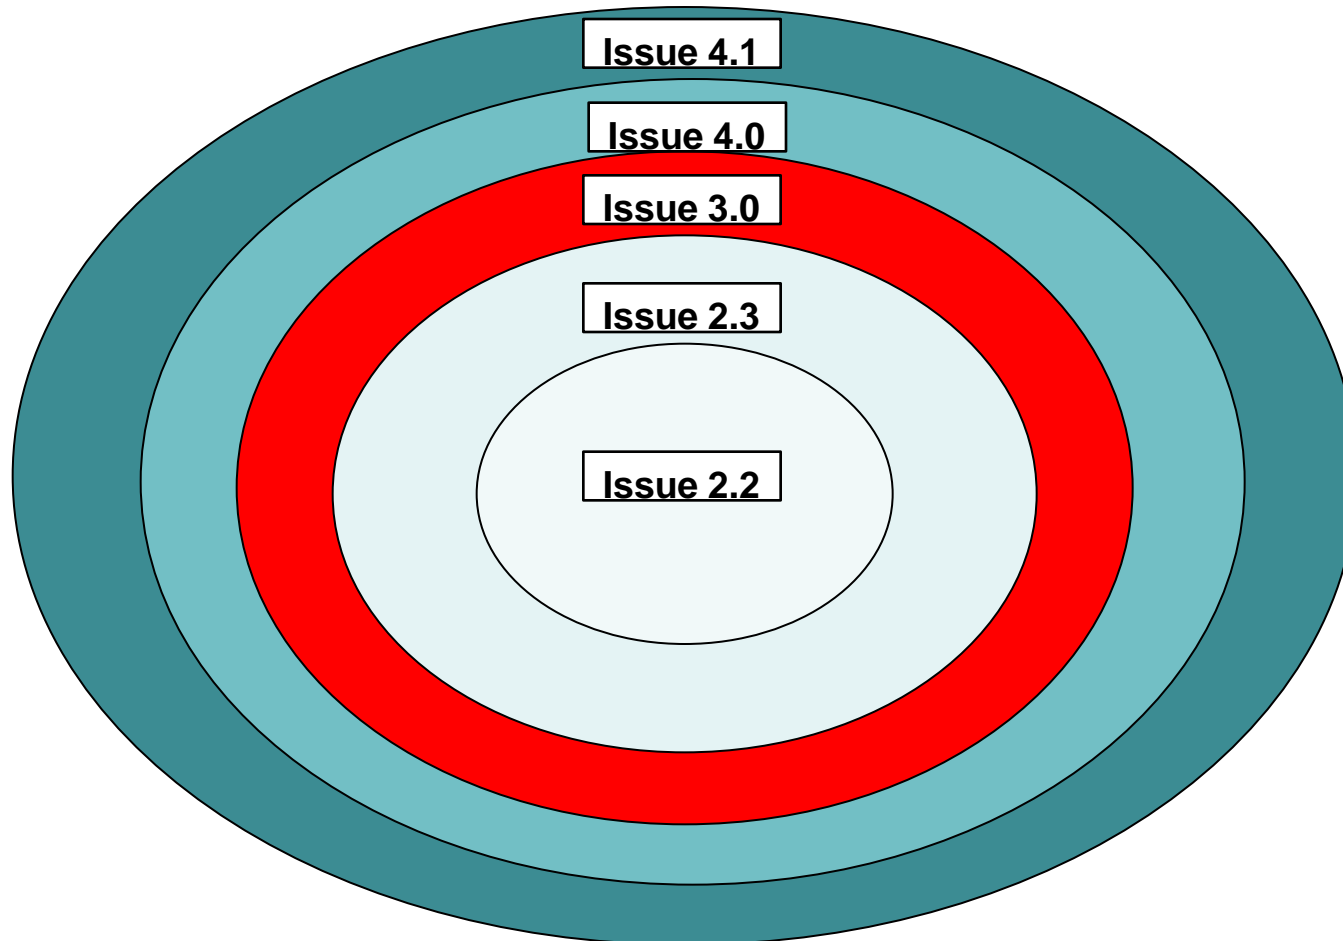

2002 - AIA Memorandum of Understanding signed and USA TPSMG co-chair agreed

2003 - Issue 2 of specification featuring USA requirements

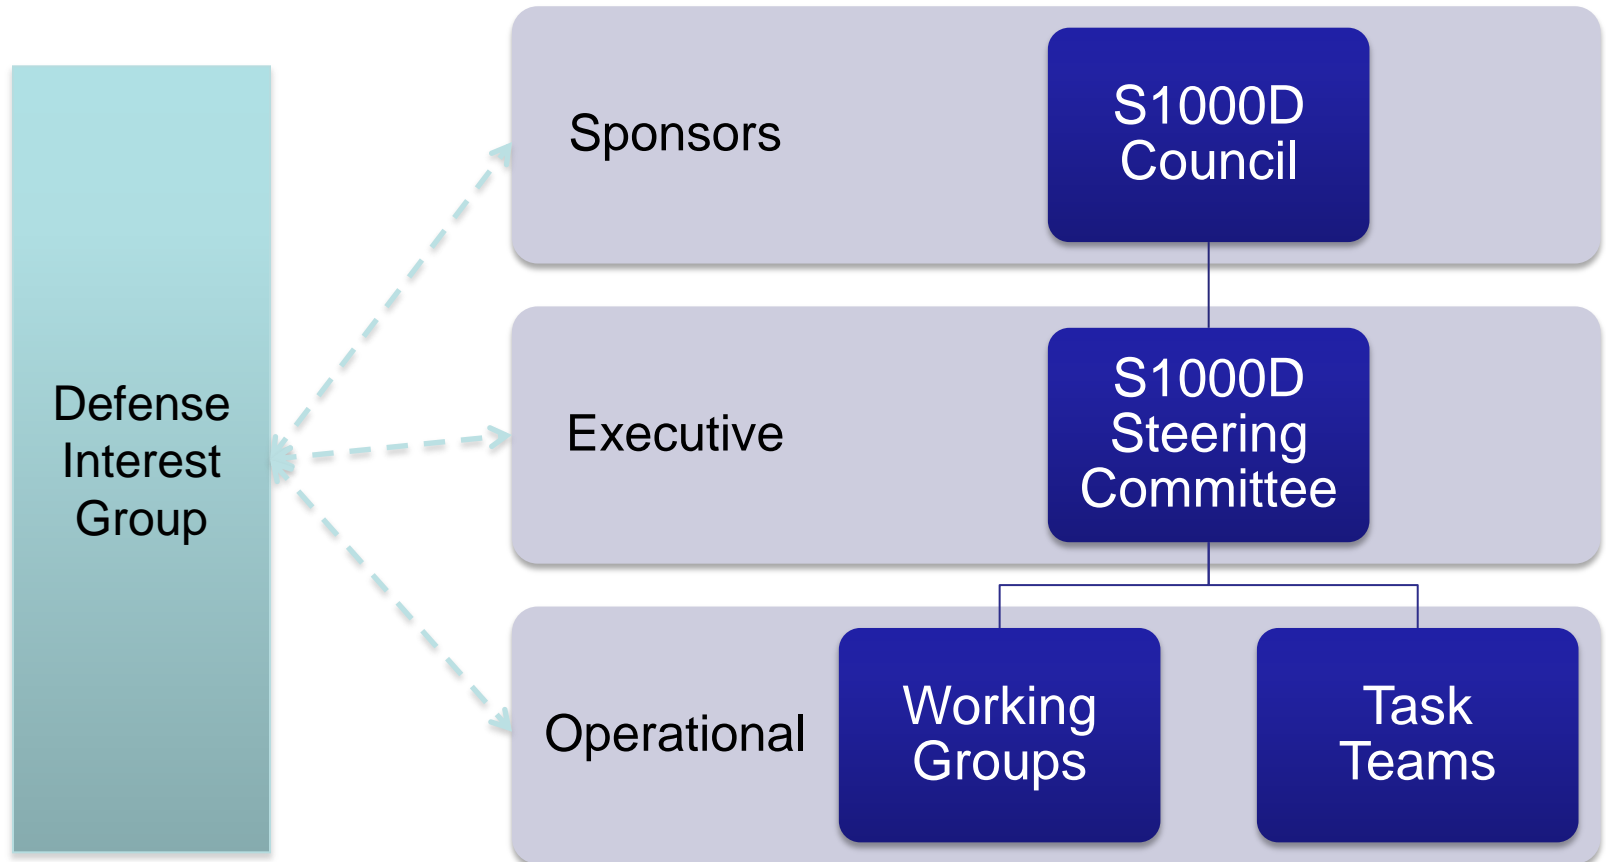

... some are active ...

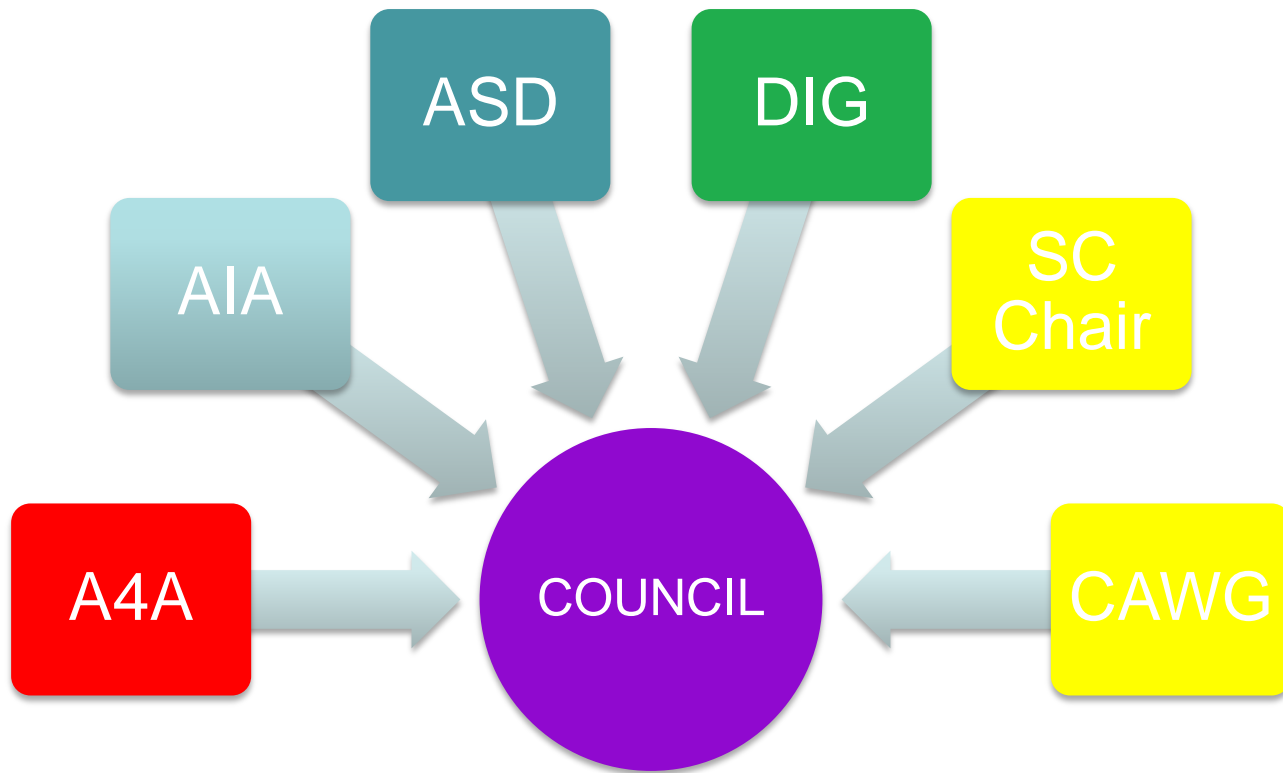

# Specification Growth

# Organization

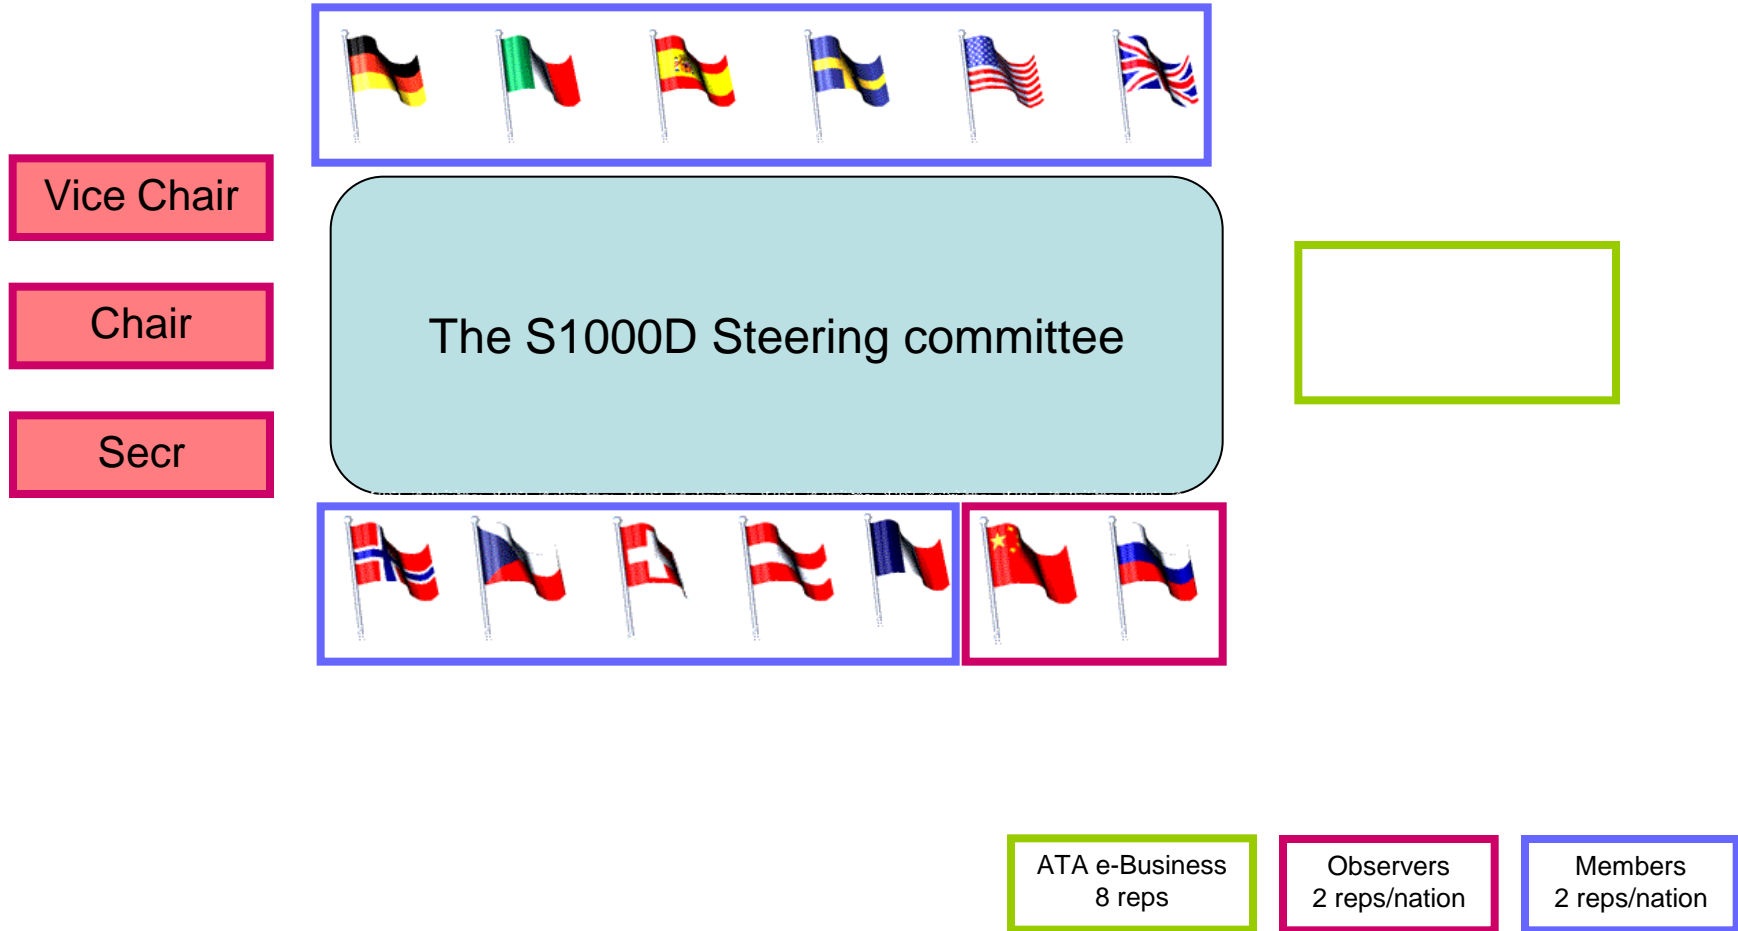

# S1000D Council

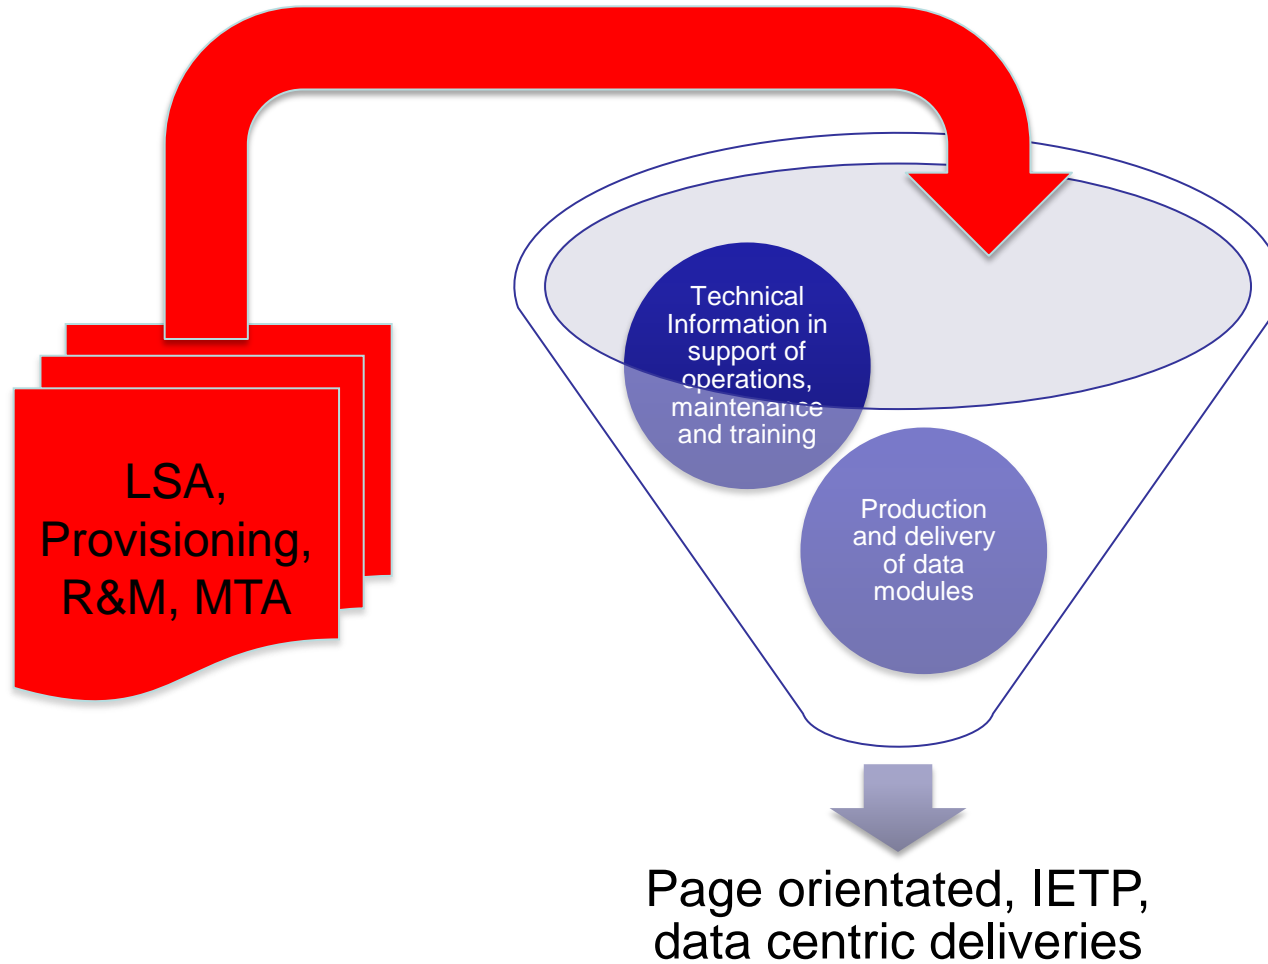

# The S1000D Steering Committee

## S1000D-SC

# Scope of S1000D

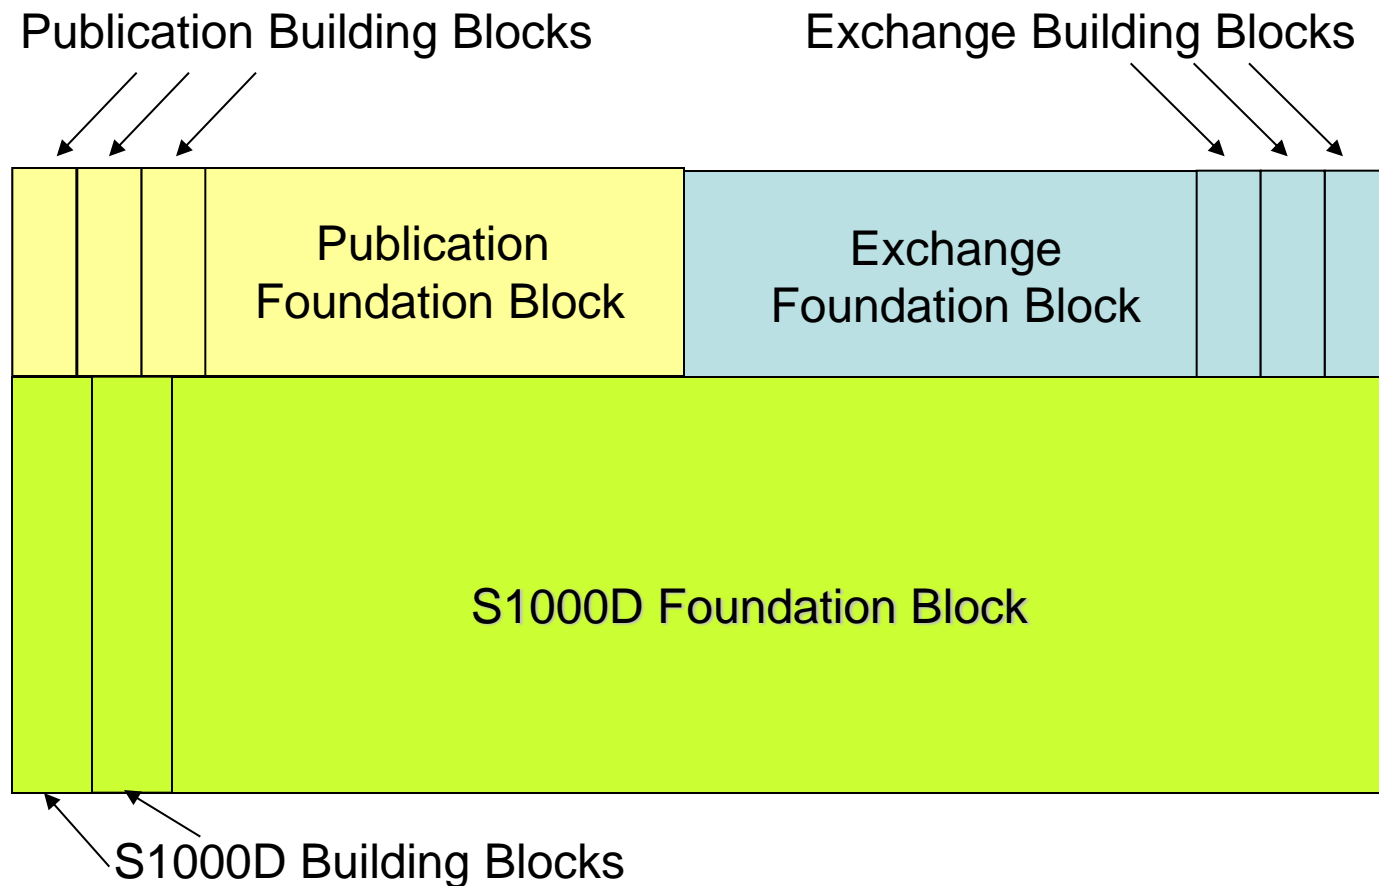

# Council Vision and Mission

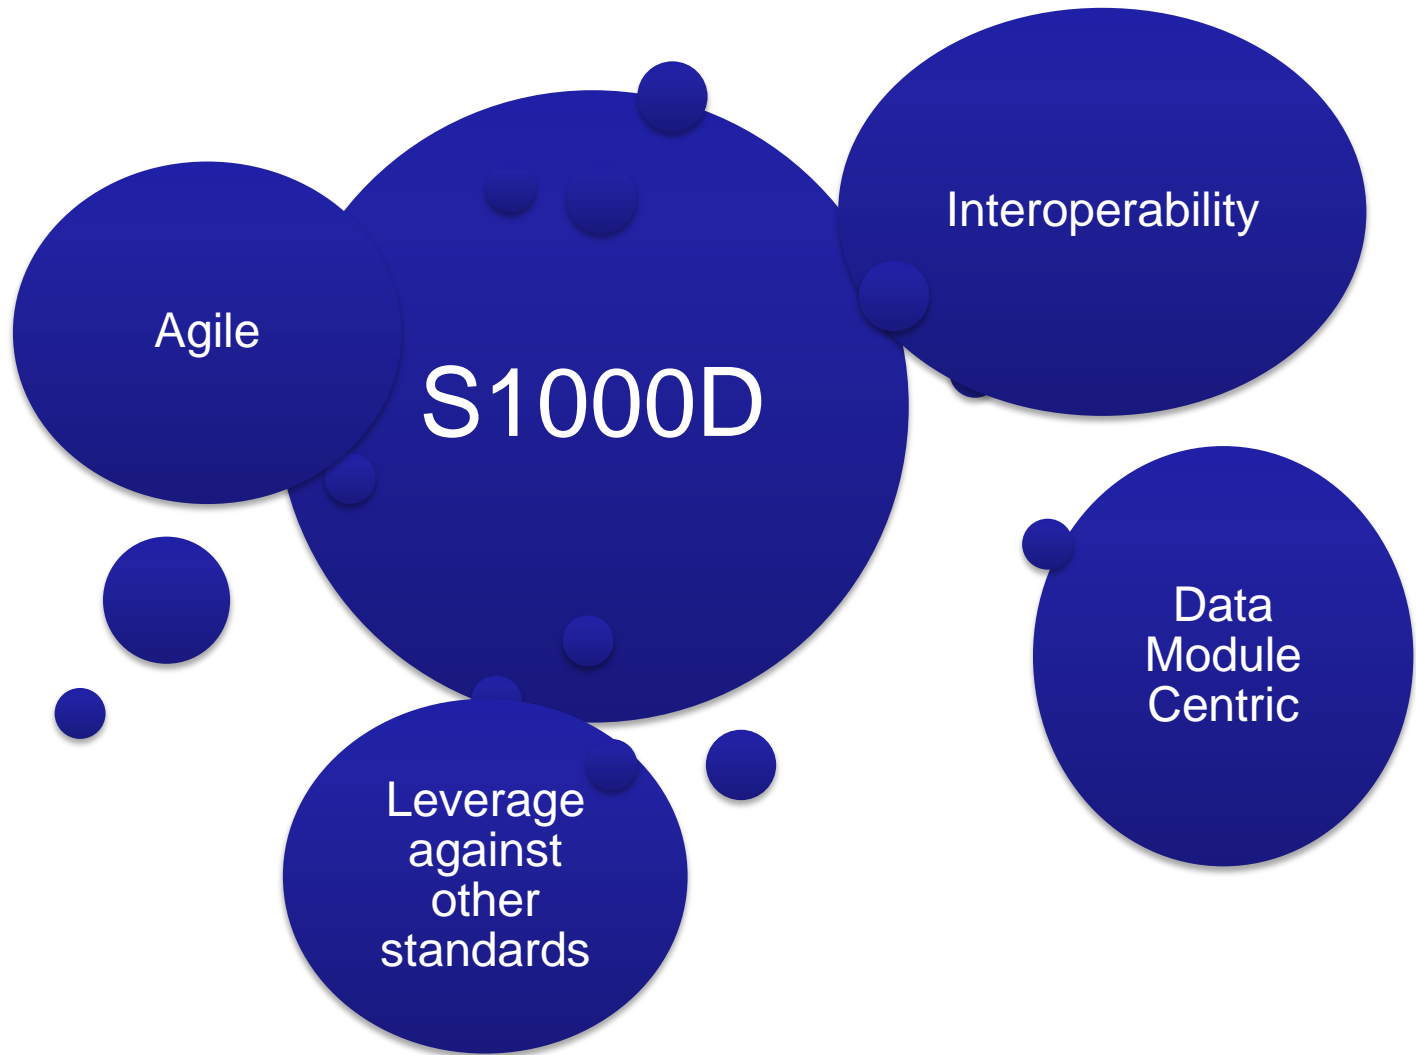

**Mission** -Achieve optimum reuse and interoperability of technical information by providing an agile, efficient, data module-centric, platform-neutral specification, while maintaining consistent data structures, leveraging other standards, and helping meet applicable regulatory requirements.

**Vision** - To be the globally adopted specification for efficient interoperable technical information for operations, maintenance and training that support the life cycle of the product.

# A Modular Specification

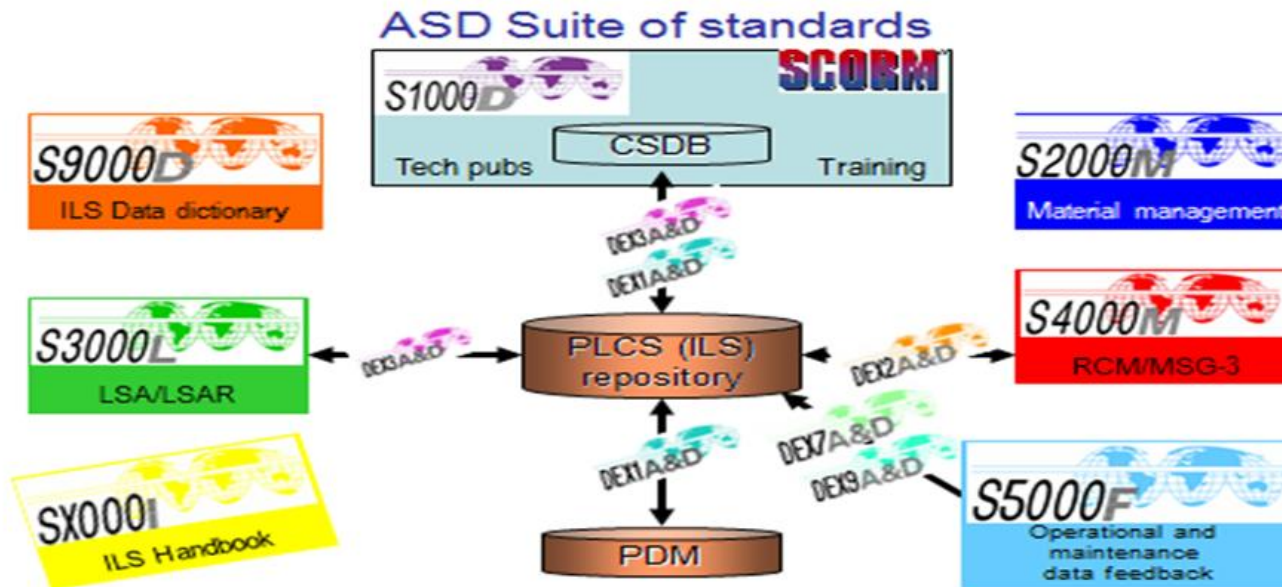

# Goals

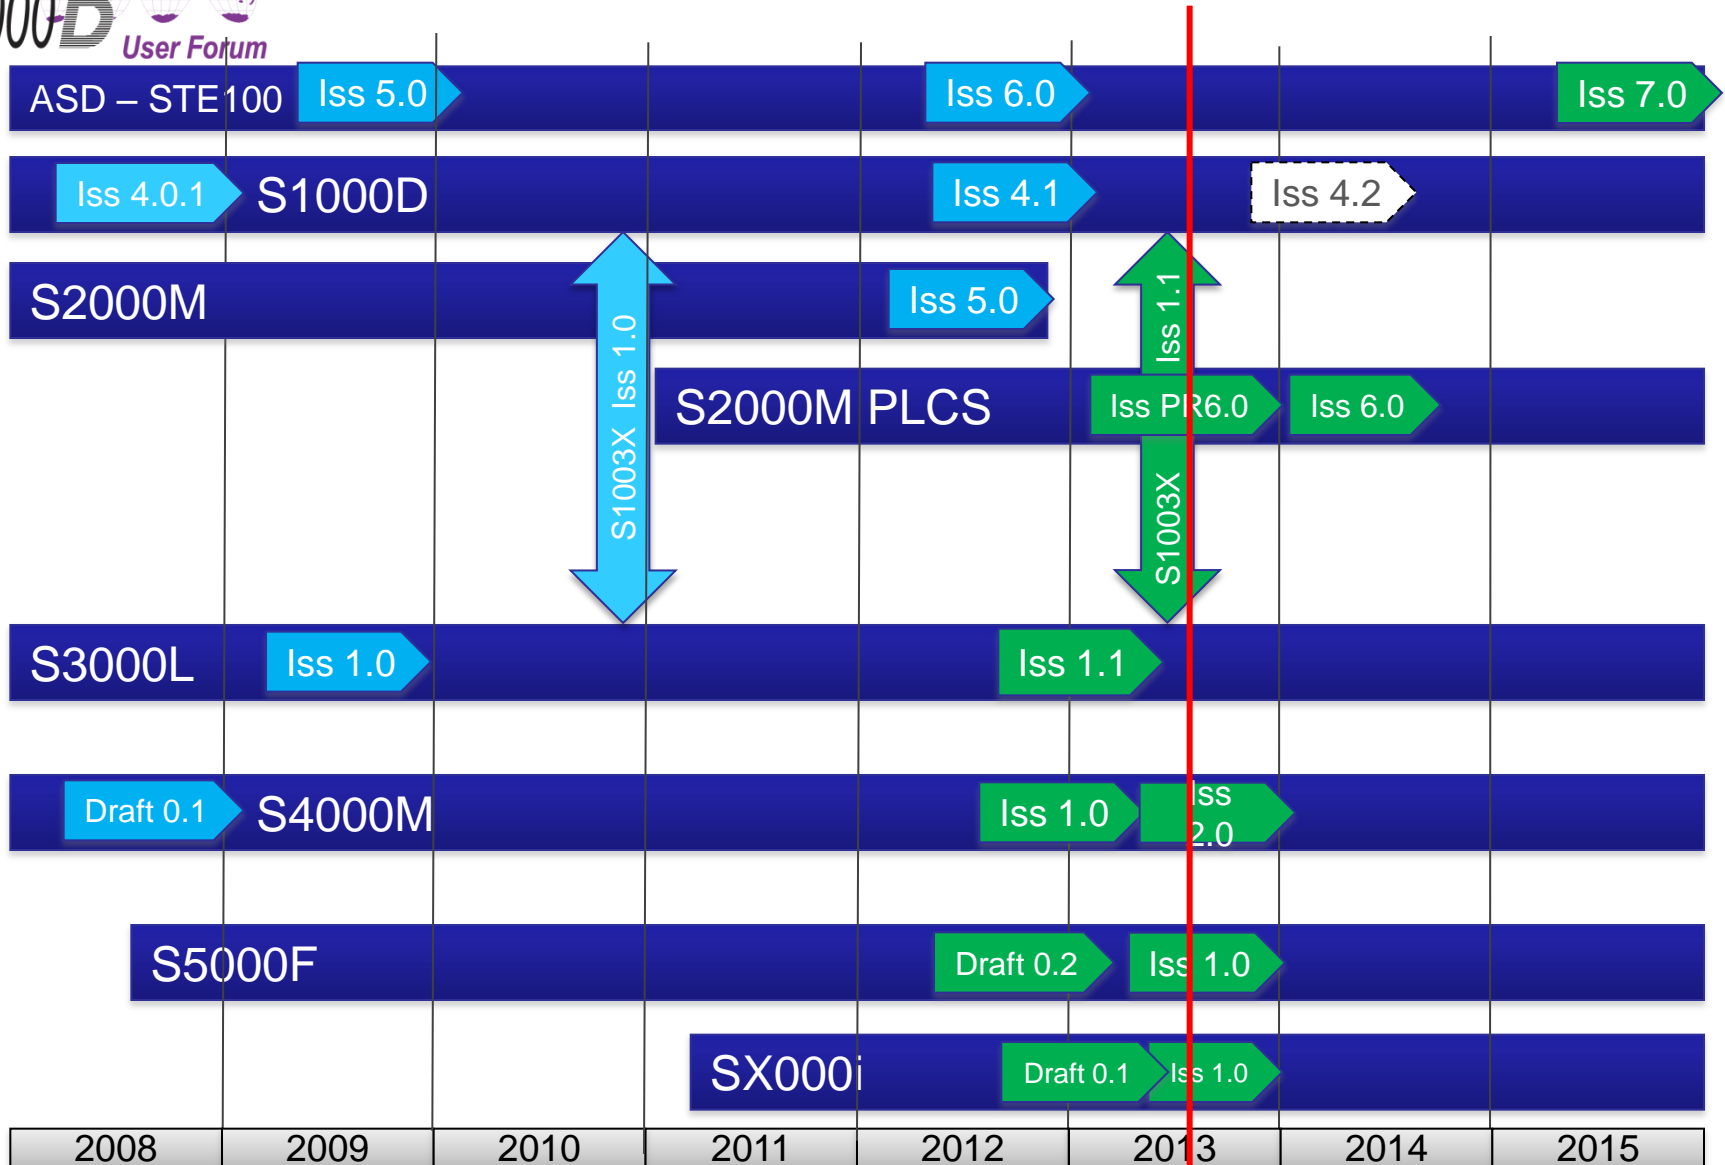

# ASD Standards

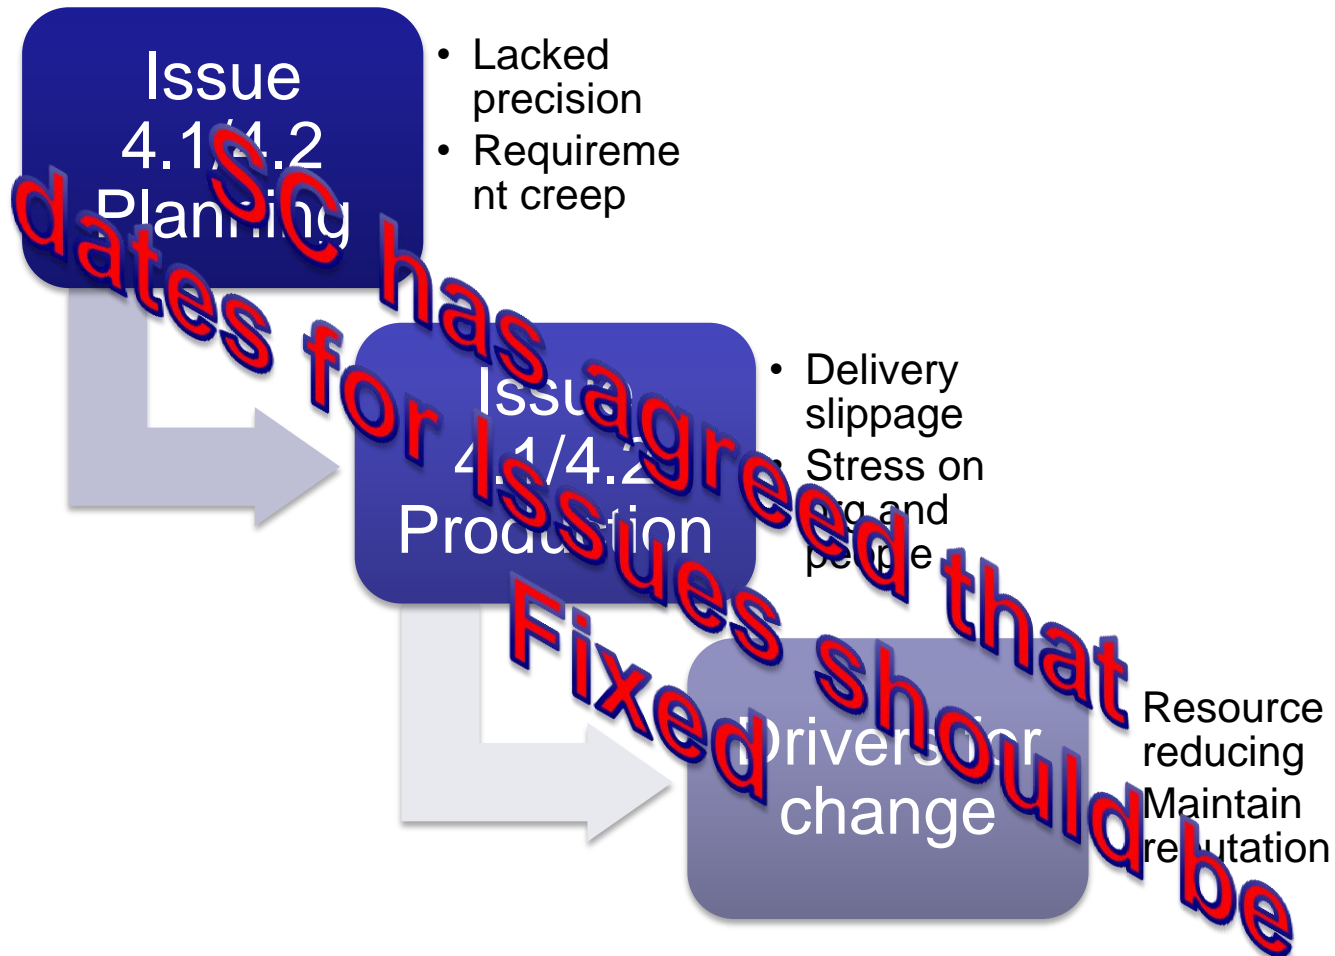

- S1000D one of the suite of Support standards being produced and managed by ASD

# The S-Series ILS specifications - Issue plan

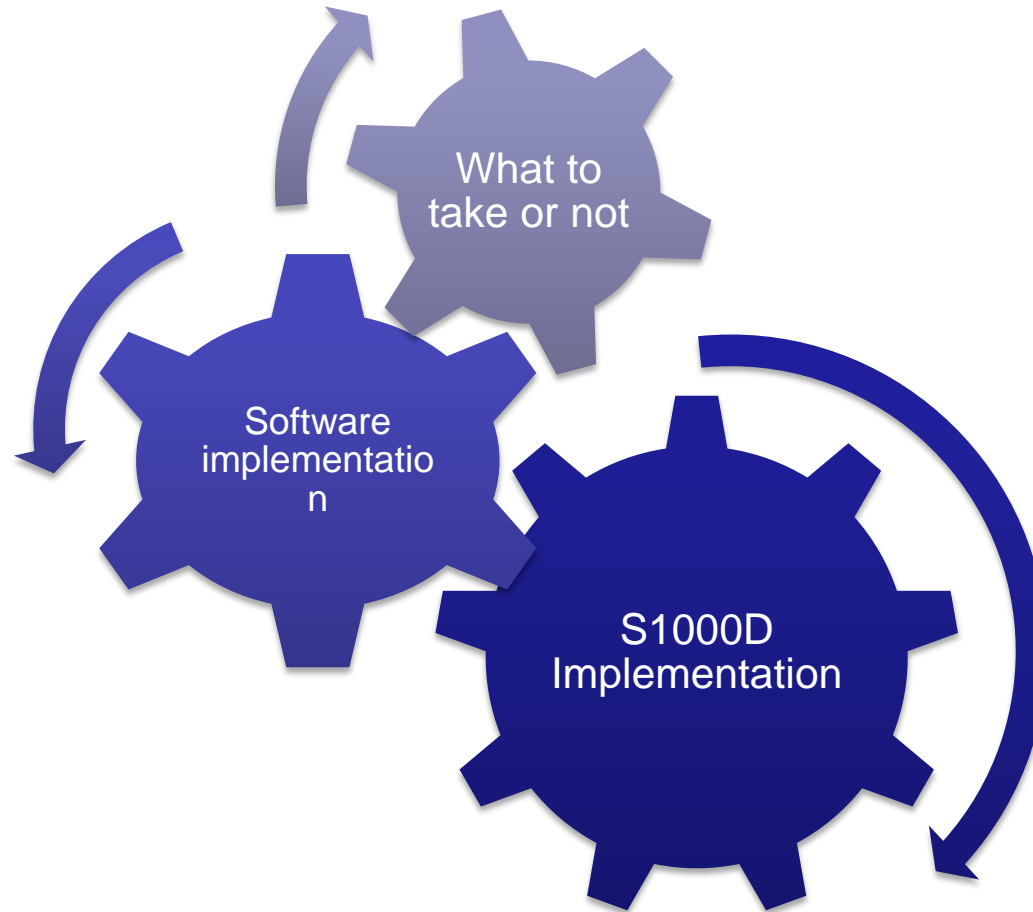

# Planning

# Implementation Problems

# Way Forward

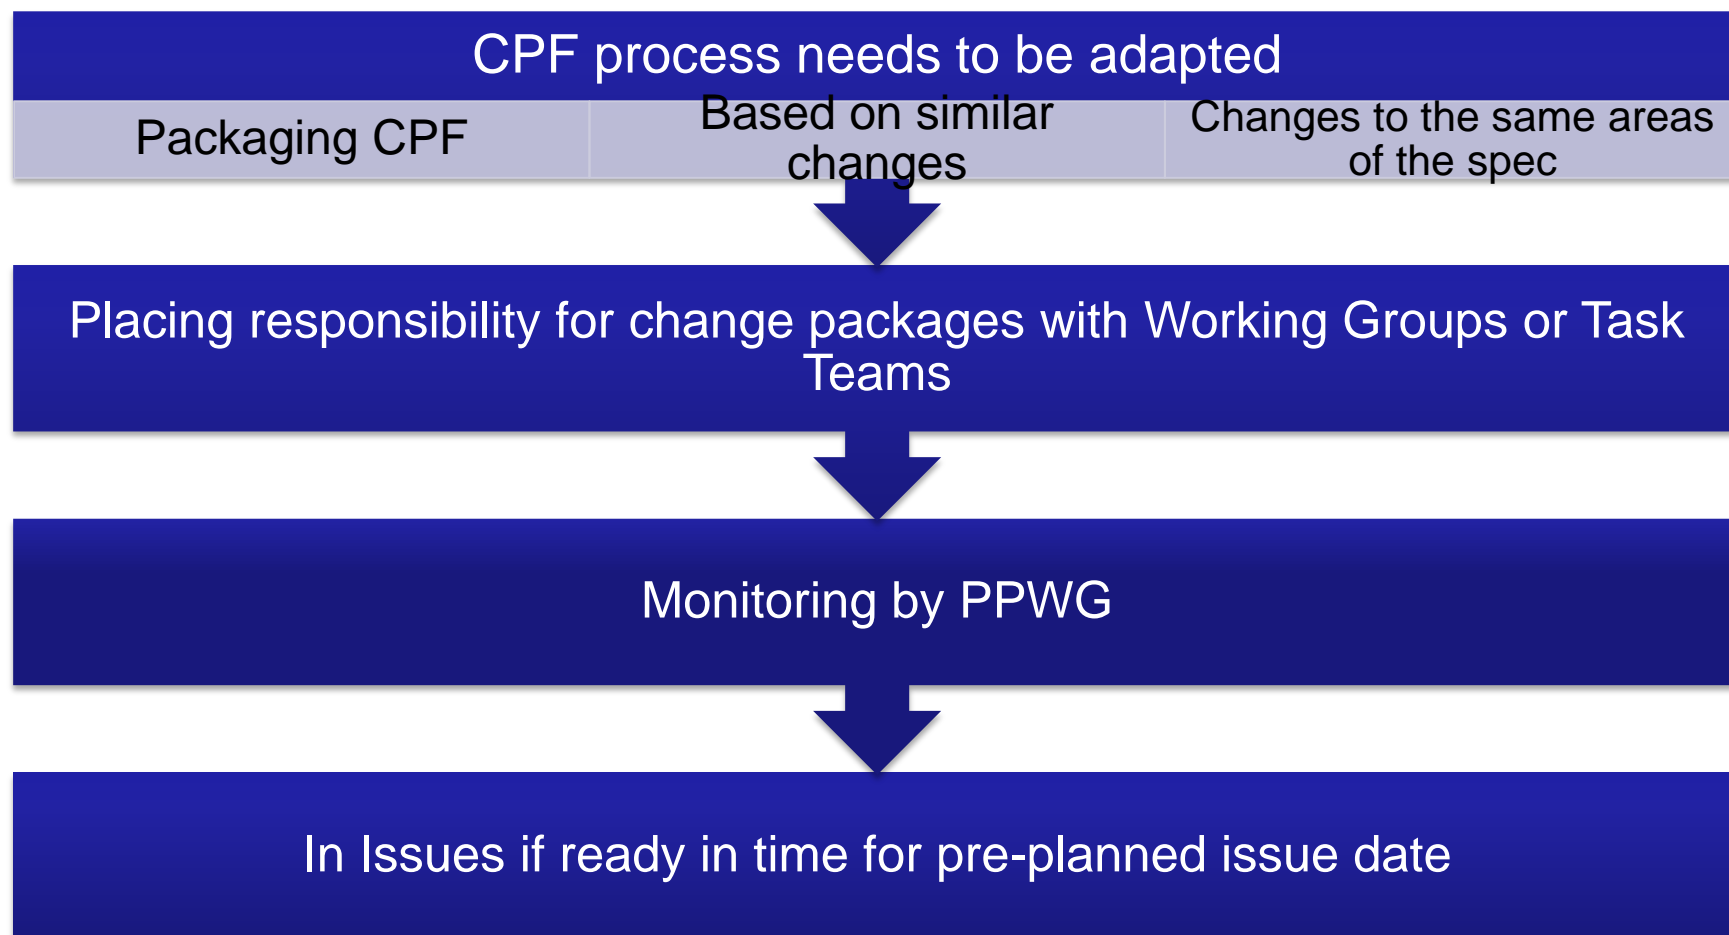

Create Plan

CPF Process

Progress modularization

Arrange meetings to meet plan requirements

# CPF Process

# Modularization

# Issue Policy

Minor is the point issue (e.g. 4.1) and must be backwards compatible with previous Issue.

Major is a issue that includes major changes (e.g 4.0). Currently, we maintain back as far as 3.0.

When Issue 5.0 (modularisation) comes out, backwards maintenance goes back as far as the last major issue (i.e. 4.0).

It was noted at SC 19 that this is a minimum requirement

# Maintenance Policy

## Maintenance strategy

Support bug fixes for previous issues back as far as 3.0

No added functionality

## Backward compatibility

For point issues is back to the last major issue

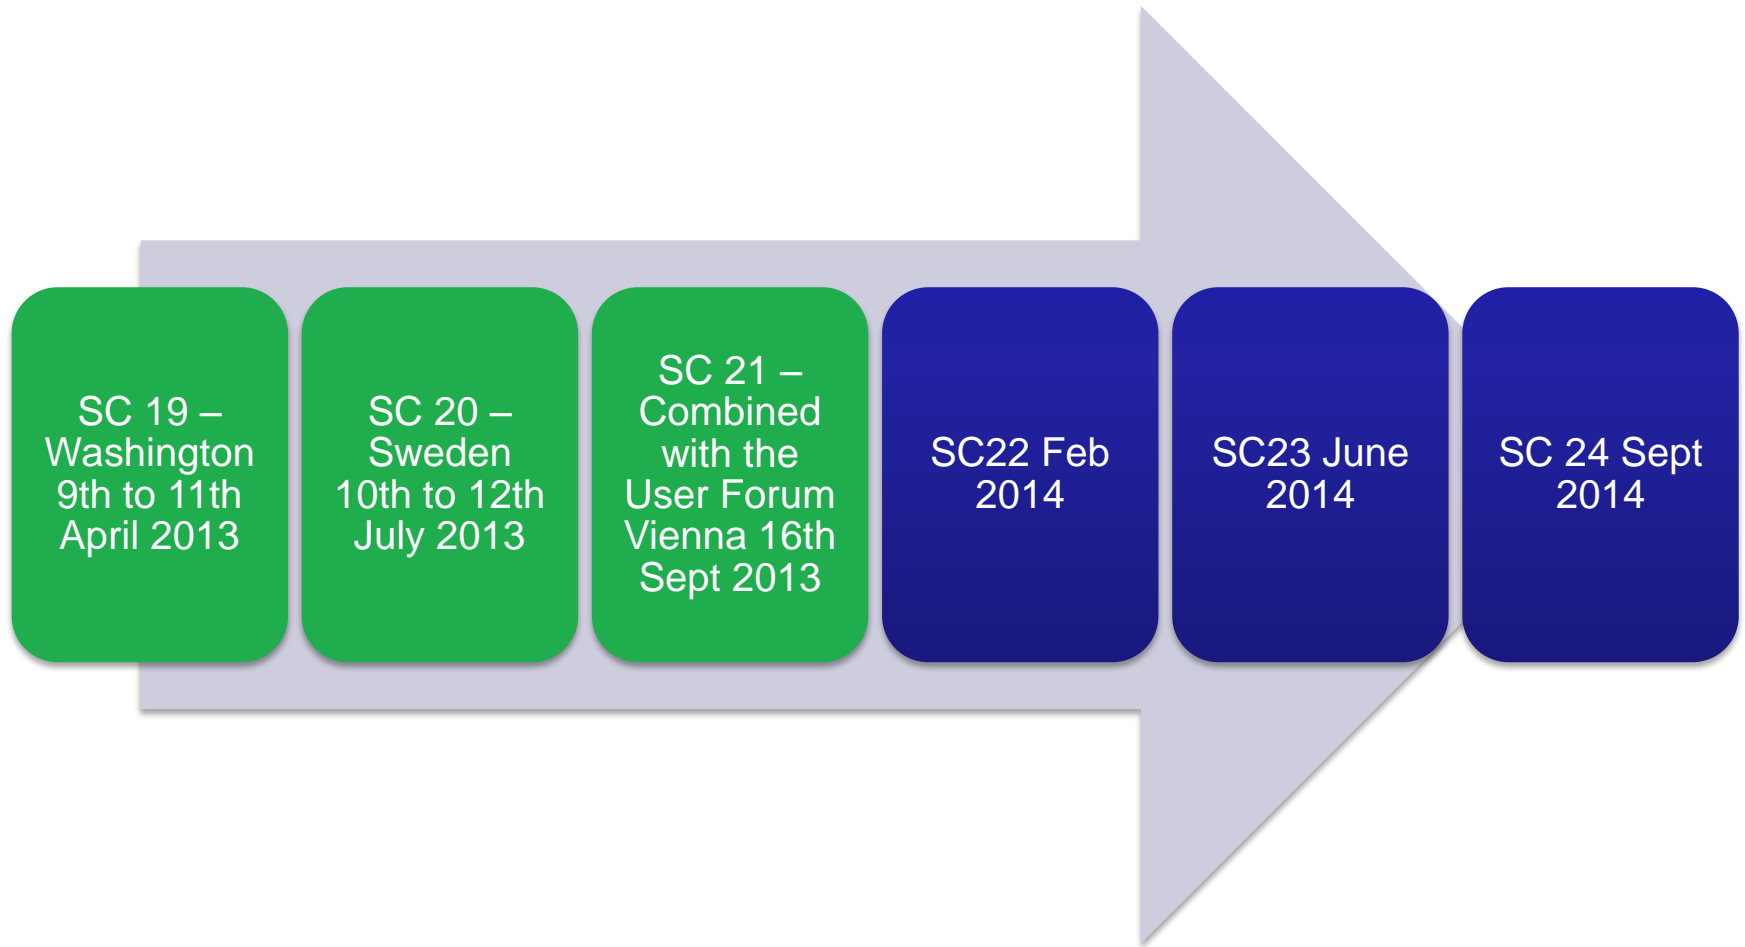

## Issue 4.2 planning assumptions

Schema BUG  
fixes and  
associated  
Chapter text  
changes

All current  
Pending approval  
CPFs

Urgent CPF as  
defined by the  
SC.
